

New Case Definitions

Tuesday, July 11, 2023

10:00 am - 11:00 am (MDT)

Online Webinar

Mark your calendars for July 11, 2023 and don't miss out on this valuable opportunity.

This session is specifically designed for State Data Managers, EMS Software Vendors, Researchers, and QA/PI professionals. If you fall into any of these categories, this event is tailored just for you!

The NEMESIS Technical Assistance Center is bringing you the latest case definitions that are widely tracked in EMS for performance improvement and research purposes. These case definitions provide specific criteria recommended by the NEMESIS TAC to ensure consistency across the industry.

Be ready to learn about the newly developed case definitions in the following areas: Behavioral Health, Micromobility, Patient Death, and Seizure Sepsis.

By attending this session, you'll gain invaluable insights into the latest recommendations from the NEMESIS TAC. This knowledge will empower you to improve your data management practices, enhance research outcomes, and drive performance improvement in EMS.
